

Backe's requirements concerning ethical conduct and social responsibility

Principles of sustainable business conduct

Backe is a long-standing and highly reputable player in the construction sector in Norway. Our core values are professional expertise, ambition and honesty. We are committed to being a responsible employer, providing safe and secure workplaces for our employees, providing training to add new skilled workers to our workforce, and fostering an open corporate culture. We are committed to maintaining high ethical standards in all our business activities and purchasing. Our vision is 'Together we make a difference' and we endeavour to base all our actions on long-term and sustainable thinking.

These guidelines have been developed as part of Backe's commitment to responsible business conduct – doing business in ways that respect people, society and the environment. Our suppliers and external partners can expect our cooperation in efforts to ensure compliance with the requirements set forth in this document.

Backe is a member of Ethical Trade Norway and the requirements set forth in this document have been developed in collaboration with Ethical Trade Norway.

Supply chain sustainability requirements

Backe's suppliers must cooperate to ensure compliance with the requirements set forth in this document in order to achieve sustainable business conduct.

Our suppliers must assess and be able to document compliance with these guidelines throughout the supply chain, at no cost to Backe.

Suppliers who are covered by the Norwegian Transparency Act (*Åpenhetsloven*) are obliged to conduct due diligence assessments in relation to fundamental human rights and decent working conditions and publish the results on their own websites. On request, suppliers must allow Backe to access the actual due diligence assessments.

Suppliers that are not covered by the Transparency Act are obliged, if so requested by Backe, to supply information about purchases and their own supply chains.

The contents of this document must be communicated to all subordinate levels of the supply chain.

These principles for sustainable business conduct are based on UN and ILO conventions and establish minimum, not maximum, standards. The laws that apply at the place of production must be respected. In cases where national laws and regulations cover the same topics as these guidelines, the most stringent standard applies.

If suppliers discover unsatisfactory working conditions or practices that relate to their work with Backe, we request that the matter is taken up with Backe. Backe has also set up a whistleblowing system that can be used to make anonymous reports: <https://backe.no/varsling>.
